IT DEPARTMENT

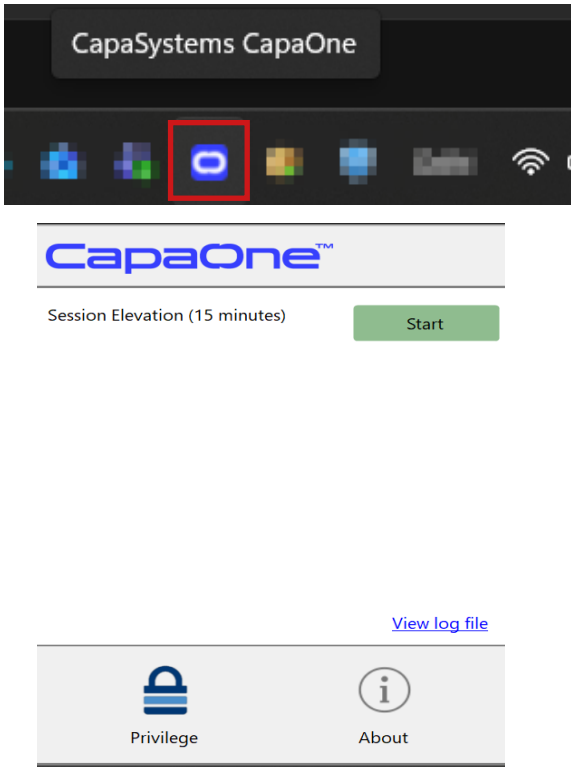
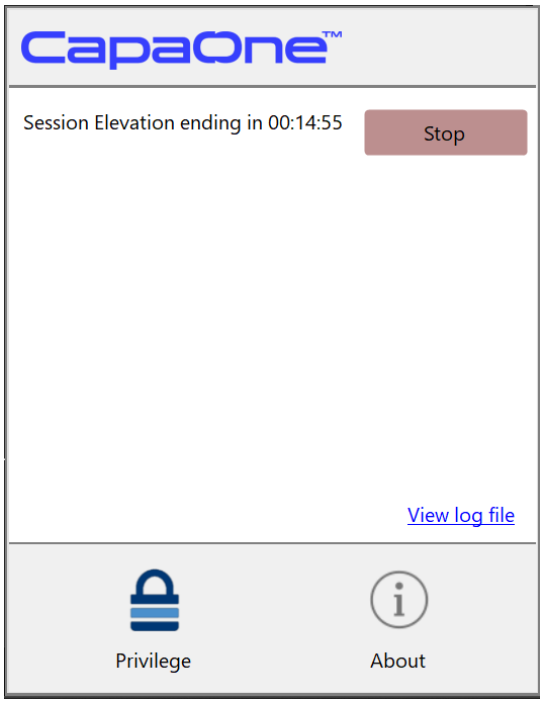
1.1

To retrieve the local Administrator rights, go down in the taskbar corner and right-click the CapaOne-icon and press “Start”.



1.2

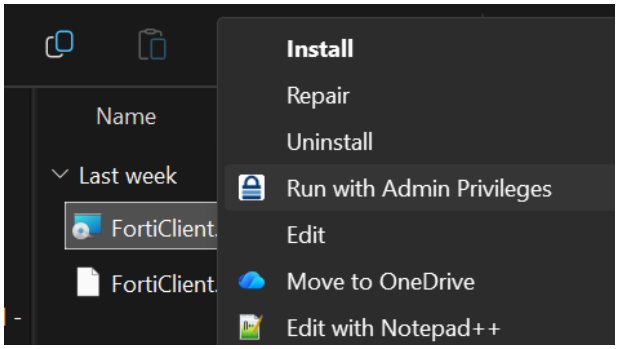
The session has now been elevated with local Administrator rights and is active for a limited time, after which you will need to restart it if needed.



1.3

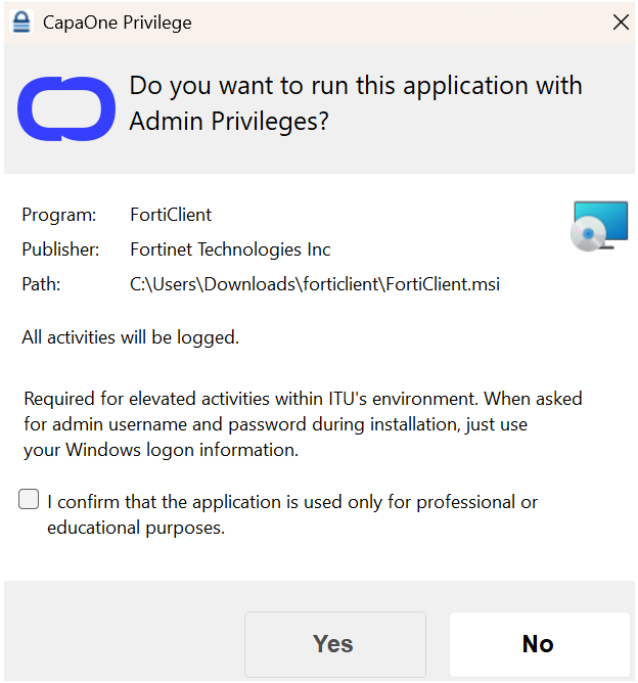
When installing software as a local Administrator you can double click it, or right click it, and use “Run with Admin Privileges”.

Right clicking should also be done when, for example, running “cmd. exe” with local administrator rights.



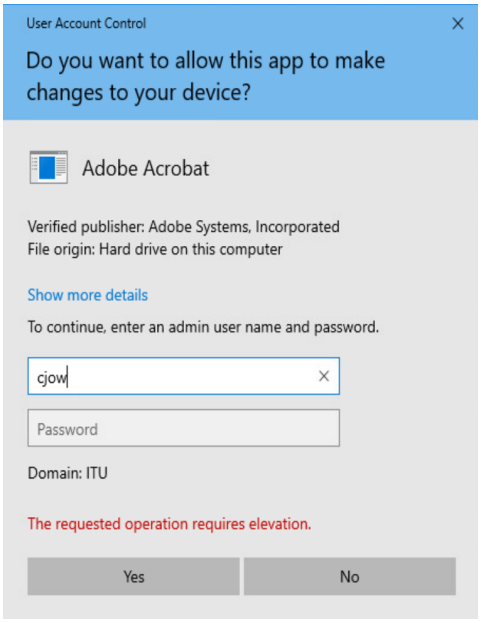
1.4

A prompt by CapaOne Privilegevv will open, and to continue, check the small box next to “I confirm…” and click “Yes”.



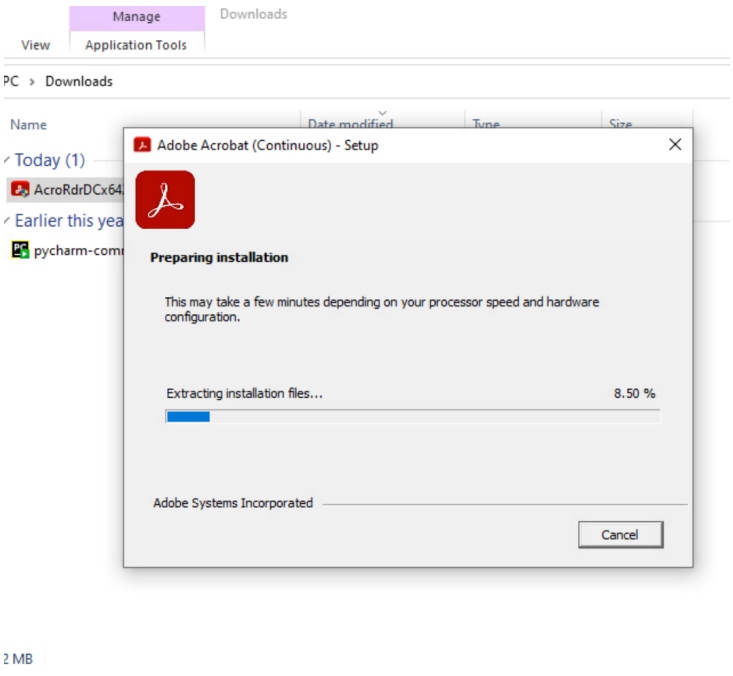
1.5

In the next window, called User Account Control, type your Windows logon information (ITU username, without "@itu.dk") and click "Yes" to continue



1.6

The software now begins to install with local Administrator rights.



If you have any questions, please contact it@itu.dk

Tip

Fasten the “CapaOne”-icon to always show on the taskbar for easier access.
