Meeting SAT Computer Science 8 October 2019

Minutes Approved.

- Dan Witzner Hansen (HoP SWU) – from kl.13.30.
- Laura Caroline Cholvat (Student rep., SWU)
- Anders Stendevad (Student rep., DS)
- Paolo Tell (Faculty rep.)
- Jesper Bengtson (Faculty rep.)
- Sara Gjerløv (Academic supervisor)
- Allette Bjørn Bundgaard (Prog Coor SWU/CS/SDT)

Absent:

- Emma Arfelt Kock (Student rep., CS)
- Natalie Elaine Schluter (HoP DS)
- Philippe Bonnet (Faculty rep.)
- Liselotte Lagerstedt (Prog Coor SEN)
- Marco Carbone (HoP CS and SDT)
- Mette Holm Smith (Prog Coor DS/SD)
- Søren Debois (HoP SD and SEN)
- Theodor Christian Kier (Student rep., SWU)

Minutes:

1. **Approval of agenda:** Agenda approved. Point 7 postponed to next meeting.

2. **Approval of minutes:** Minutes approved.

3. **Information:** None.

4. **Update from study programs:** / Students.

    DS: Nothing to report.

    SWU: Laura puts a head up on the situation that SWU courses Operating Systems and C + Programs as Data on fifth semester align to a large extend, and it works very well for SWU. However, DS students take only Operating Systems and C.

    SAT should keep an eye out as to how this works for DS.

5. **Renaming of course: Mobile and Distributed Systems on SWU and SD.** / Marco

    Change of title to Distributed Systems.

    Reasons:

    1) "Mobile and" is redundant and

    2) Some students often misinterpret the title; by thinking, that mobile refers to mobile phones.

Dan and Søren recommend the change.

A SAT member, who took the course, finds the new title suits what happens in the course. SAT recommends the change.

6. **Application for X-form examination for DS course.** Appendices 6a and 6b.

SAT discussed the proposal and have the following comments:

- Previously, one SAT member took the course with the proposed X-form, which worked really well.
- The workload on this course aligned well with the other courses on second semester.
- If Administration is happy with this examination form, SAT finds no reason to suggest any changes, as it seems to please both students and teachers.

7. **Replacement of mandatory modules for SD in SAT CS. / Søren**

We have a handful of students who already in their first semester applies for replacement of courses based on courses from their bachelor. When granted a replacement the students have to take other courses on their first semester. The problem is that the students do not have the prerequisites to follow approved electives for SD, as they are mainly 3rd semester courses and 1st semester's CS courses and some Games courses. Which courses could be relevant to take for these students?

Postponed to next meeting.

8. **Suggestion to withdraw proposal from SAT CS to Study Board.** Appendix 8a.

Approved.

9. **AOB:**

Nothing to report.
