

USING THE PROJECTOR

Please have patience when operating the projector.

It takes some time for it to respond to buttons being pressed.

1. Make sure the OFF light on the panel is turned on and lights up constantly.
2. Press on the appropriate display port on the panel.
3. Mic. Press volume mic on panel.
4. Turn off the monitor, when done using it. Hang the cables in place. Leave the room in the same condition as you want to receive it in.

Best Regard FM.
