5. Passing of certain courses as a prerequisite for continuing a programme

Student body and teachers from Games agree that forcing students to take all three exam attempts after taking the course only once is didactically worse than giving them a chance to take the course again in the 3rd/4th semester. 'Weeding out' students after acceptance is not a good idea, as it wastes both teaching resources and the students' time.

6. Study Board representatives in the fall

Nikolaj Licht agrees to become student representative.

7. Game Lab

SAT student representatives compile list of materials for prototyping in the gamelab in the order of 1000-2000 DKK and present it to Martin for acceptance.

8. Evaluation reports; final and other projects Jan-June 2018

- The return rate was very low (5)
- One out of three students was very unhappy with their own effort. All other data are in the green.

9. Grade Report

- Data from 2017 (i.e. old Games programme)
- Apparently studying became slightly worse.
- Our students are mostly passing; worst fail rate 20% in Qualitative Methods (course no longer offered)
- It will be interesting to see these figures for the new programme.

10. Any other business

- Oral exam dates for individual projects are now announced only 3-7 days before the exam. The students feel that this is unduly short notice and ask for an earlier appointment. The teachers support this request.
