

How to install the Device Monitor

When in WISEflow go to the upper right corner, click on the arrow next to your name and choose “Edit profile”.

Click from “Profile” to “System”.

Scroll down until you see WISEflow Device Monitor and click “download”

The screenshot shows the WISEflow user profile page. At the top right, the user's name 'Perille Marie Storgaard' is displayed with a dropdown menu containing 'Edit profile' and 'Log out'. Below this, the 'User Profile' section has two tabs: 'Profile' and 'System', with 'System' selected. The 'Lockdown Browser' section is crossed out with a large blue 'X'. Below it, the 'WISEflow Device Monitor' section is visible, featuring a 'Download and install' section with a 'Download' button and a 'Test WISEflow Device Monitor' section with a 'Test monitor' button. A 'Setup guide' button is also present at the bottom of the section.

Test WISEflow Device Monitor

The option to test Device Monitor is to make sure you have the newest updated version. It is recommended that you check this before each exam.

Click “Test monitor”. If you are ok for the exam, confetti will be sprinkled around.

Please note that if you’ve clicked on “Test monitor” make sure that you close it again, otherwise you can’t open the Device Monitor.
