

IT University
of Copenhagen

**Curriculum for the Master of Science Programme in Information Technology at the IT University of Copenhagen, the MSc study programmes belonging under the Board of Studies ITU:
Digital Design and Communication
Media Technology and Games
Software Development and Technology**

1 August 2010

Contents

Background

Chapter 1. The programme, its objectives, duration and titles

Chapter 2. Admission requirements and conditions

Chapter 3. Structure, contents, etc.

Chapter 4. Examinations

Chapter 5. Programme specific rules

Chapter 6. Miscellaneous regulations

Chapter 7. Date of commencement and transitional regulations

Background

This curriculum for the Master of Science Programme in Information Technology has been drawn up by the Board of Studies ITU at the IT University of Copenhagen (henceforth referred to as the IT University) and applies to the three MSc study programmes above belonging under the Board of Studies ITU. The curriculum has been drawn up in compliance with the Executive Order on Bachelor's and Master's (Candidatus) Programmes at Universities (the Order on Study Programmes) from the Ministry of Science, Technology and Innovation (executive order no. 338 of 6 May 2004).

Students enrolled in the above MSc study programmes with study start from autumn of 2010 study according to this curriculum.

Students enrolled in the IT University's MSc study programme E-Business study according to the current curriculum for the MSc study programme in E-business.

Chapter 1

The programme, its objectives, duration and titles

Objectives

Section 1. The purpose of the Master of Science Programme in Information Technology is to provide students with the scientific qualifications to identify, formulate, solve and reflect on complex problems relating to information technology.

Subsection 2. The programme prioritises the student's ability to assess, apply and develop the underlying technology as well as the scientific theories, methods and tools upon which it is based.

Subsection 3. The student must have the ability to independently initiate and carry out collaborative work in professional and multidisciplinary settings -. Furthermore, the student must have the ability to engage in global and distributed interaction, drawing on research-based perspectives.

Subsection 4. On the background of the student's preceding bachelor's programme, the programme provides the student with the qualifications to define his or her own academic profile within the field of information technology and to take independent responsibility for his or her own professional development and specialisation.

Subsection 5. Within the framework of the programme, the student can acquire the requisite individual qualifications for specialised posts in business and industry as well as for research training programmes (PhD programme) in information technology, cf. section 2, subsection 1 of Consolidation Act on Universities (the Danish Universities Act) from the Ministry of Science, Technology and Innovation (consolidation act no. 985 of 21 October 2009) and section 3, subsection 3 of the Executive Order on Education.

Study Programmes

Section 2. The Master of Science programme includes the MSc study programmes below, each of which extends the student's knowledge of specific academic disciplines.

Subsection 2. The following study programmes belong under the Board of Studies ITU:

- Digital Design and Communication (K-DDK)
- Media Technology and Games (K-MTG), which comprises two admission areas: Design and Analysis (K-MTG-DA), and Technology (K-MTG-T)
- Software Development and Technology (K-SDT)

Subsection 3. The following study programme belongs under the E-business Board of Studies:

- E-Business (K-EBUSS). Students enrolled in the study programme E-Business study according to the current curriculum for the MSc study programme in E-Business.

Subsection 4. The IT University is empowered to outsource parts of the programme to Roskilde University, Copenhagen Business School, Technical University of Denmark and the University of Copenhagen.

Duration

Section 3. The programme has a standard duration of 120 ECTS points. 60 ECTS points correspond to one year of full-time studies, cf. the Order on Study Programmes section 6, subsection 3. The programme is a full-time programme which entails that students are expected to study full-time.

Subsection 2. The programme must be concluded within five years. Under special circumstances, the IT University is entitled to grant exemptions from this regulation.

Subsection 3. The IT University may without further notice end the enrolment for stu-

dents who have not been active in their study programme for a period of at least 1 year, cf. section 36 in the Executive Order on Admission etc. in Connection with Bachelor's and Master's Programmes at Universities (the Admission Order) from the Ministry of Science, Technology and Innovation (executive order no. 181 of 23 February 2010). Under special circumstances, the IT University is entitled to grant exemptions from this regulation, cf. the Admission Order section 36, subsection 3.

Subsection 4. A student, who does not pass any examinations corresponding to at least 7.5 ECTS points within a period of 1 year, is not active in his or her study programme.

Titles

Section 4. A student, who has completed the Master of Science programme in Information Technology, has the right to use the title *candidatus/candidata informationis technologiae (cand.it.)* with the addition of the designation for the appropriate study programme.

Subsection 2. The title in English is Master of Science (MSc) in IT.

Subsection 3. The study programme titles in English are:

- Digital Design and Communication
- Media Technology and Games
- Software Development and Technology

Chapter 2

Admission requirements and conditions

Admission requirements

Section 5. Admission to the Master of Science programme is conditional upon the applicant having successfully completed a bachelor's programme or the like.

Subsection 2. The programme-specific rules for each MSc study programmes may contain admission requirements pertaining to the individual study programme.

Subsection 3. The IT University has the authority to grant admission to applicants, who do not meet the requirements in subsections 1 and 2, but who on the basis of a concrete assessment are considered to have academic qualifications comparable to this. The university may require supplementary tests, cf. the Order on Study Programmes section 9, subsection 3.

Conditions of admission

Section 6. Students who hold a bachelor's degree in Software Development from the IT University are entitled to admission to the Master of Science Programme in Software Development and Technology and the Master of Science Programme in Media Technology and Games (admission area Technology) in immediate continuation of the bachelor's programme. Students who hold a bachelor's degree in Digital Media and Design from the IT University are entitled to admission to the Master of Science Programme in Digital Design and Communication and the Master of Science Programme in Media Technology and Games (admission area Design and Analysis) in immediate continuation of the bachelor's programme.

Subsection 2. Subsection 1 does not apply for students who have already finished a Master of Science Programme or who have previously been enrolled in a higher education programme without obtaining a degree.

Subsection 3. For students not mentioned in subsection 1 meeting the admission re-

quirements stipulated in section 5 is a necessity but not sufficient for admission on its own.

Subsection 4. The IT University stipulates and publishes the criteria for selection of applicants if there are more qualified applicants, cf. section 5, than there are places available, cf. the Order on Admission section 29. The IT University publishes the criteria for selection in the IT University's admission rules on the university's website.

Chapter 3

Structure, contents, etc.

Term structure

Section 7. An academic year consists of two terms, the autumn term and the spring term.

Programme structure

Section 8. The Master of Science programme requires passes in *study activities* corresponding to a workload of 120 ECTS points.

Subsection 2. One term of full-time study consists of study activities worth 30 ECTS points.

Subsection 3. The study activities of the programme are composed of *modules* corresponding to 90 ECTS points and a concluding *master's thesis* corresponding to 30 ECTS points.

Subsection 4. There can be more tracks within a study programme. A track consists of one mandatory backbone, one optional specialization and optional modules.

Subsection 5. A module consists of one or more study activities. A study activity consists of a course and a project and examination or of a course or a project and examination.

Subsection 6. A module may form part of the *mandatory backbone* of an MSc study programme, form part of a *specialization* or be an *optional module*.

Subsection 7. The student must not complete study activities worth more than the prescribed 120 ECTS points.

Subsection 8. All study activities, including the thesis, are concluded with an examination. When the examination has been passed, the study activity is considered passed.

Subsection 9. If a student fails to sit for an examination in study activities for which the student has been registered, the IT University is entitled to reduce, and in special cases even reallocate, the teaching resources devoted to the student.

Subsection 10. To take part in a study activity, a student must register in advance.

Subsection 11. Students must be allowed to do project activities worth up to 15 ECTS points as well as their thesis in collaboration with students from other MSc study programmes at the IT University.

Subsection 12. When choosing study activities, it is the responsibility of the student to make sure that all requirements of his or her study programme can and will be met.

Subsection 13. There is only one Board of Studies responsible for each study activity. Only the Board of Studies responsible for a particular study activity is empowered to organize examinations and assessments.

Courses and projects

Section 9. During a *course*, the student attends organised classes, which may include lectures, assignments, practical and theoretical exercises, home study, field trips, etc.

Subsection 2. A course may form an integrated part of a module or constitute a module in itself, cf. section 8, subsection 5.

Subsection 3. A list of courses including course descriptions is published on the IT University's website by the Board of Studies ITU in advance of each term.

Section 10. A *project* consists of targeted, independent learning under supervision.

Subsection 2. A project may form an integrated part of a module or constitute a module in itself, cf. section 8, subsection 5.

Subsection 3. A project is normally done in groups of 2-5 students. Dependent on the nature of the project, the Board of Studies may grant permission for other group sizes.

Subsection 4. A project which does not form an integrated part of a module is defined by a *project agreement*.

Subsection 5. The problem formulation and frameworks for the project are defined at the start of the project. Each student taking part furthermore states what individual qualifications he or she possesses for participation.

Subsection 6. The project agreement must be approved, before a project may be carried through.

Subsection 7. One, and only one, Study Administration sees to the administration for each project agreement. The main supervisor acts as the contact person with this Study Administration.

Master's thesis

Section 11. Master's theses follow the same rules that apply to other project activities, cf. section 10. The following special conditions also apply to theses.

Subsection 2. A thesis must be worth 30 ECTS points, corresponding to a workload of half a year.

Subsection 3. The thesis must conclude the Master of Science programme, cf. the Order on Study Programmes section 21, subsection 5. The university may grant exemption from the rule in special cases, cf. the Order on Study Programmes section 74.

Subsection 4. The thesis is designed to show skills in applying scientific theories and methods when working on a defined subject, cf. the Order on Study Programmes, section 21, subsection 5. Furthermore, the thesis is designed to demonstrate that the student has achieved the objectives of the Master of Science programme, cf. section 1, and can apply, present or elaborate on specialized knowledge within the area of the appropriate MSc study programme.

Subsection 5. The thesis is defined by a *project agreement*.

Subsection 6. The thesis subject and the project agreement are prepared in collaboration with one or more supervisors. The thesis is composed individually or in a group of a maximum of 4 students. The thesis is concluded with a written report and an individual, oral defence.

Subsection 7. During the making of the project agreement, a hand-in deadline is laid down.

Subsection 8. When the project agreement has been made, cancellation is no longer possible, cf. the Order on Study Programmes section 21, subsections 6 and 7.

Subsection 9. If the student does not hand in the thesis report before the laid down hand-in deadline, an examination attempt has been used, cf. section 27, subsection 3 in the Executive Order on Examinations in University Programmes (the Examination Order) from the Ministry of Science, Technology and Innovation (executive order no. 867 of 19 August 2004).

Subsection 10. The student can only be granted leave during a thesis project period due to special circumstances.

Subsection 11. The thesis report must be composed in Danish or English. The thesis report must include a summary in a foreign language which enters into the total assessment, cf. the Examination Order, section 11, subsection 2. If the thesis is written in Danish, the summary must be written in English. If the thesis is written in English, the summary may be written in Danish or in English.

Subsection 13. The student's spelling and writing skills enter into the basis of the assessment of the thesis no matter in which language the thesis is written, however with the main emphasis being given to the academic contents, cf. the Examination Order section 11, subsection 1.

Subsection 14. Please also refer to the IT University's examination regulations.

Study language

Section 12. The MSc study programmes belonging under the Board of Studies ITU are conducted in the following languages of study:

- *Media Technology and Games* and *Software Development and Technology* are conducted in English.
- *Digital Design and Communication* is conducted in Danish. However, parts of the modules may be conducted in English.

Work experience and study trips abroad

Section 13. Study activities based on work experience must be formulated as projects, cf. section 10.

Subsection 2. Credits for study trips abroad may be transferred to the programme. Credits for educational activities during a study trip abroad can be transferred as courses and/or projects, provided they meet the requirements, cf. section 29.

Chapter 4

Examinations

Section 14. The IT University issues diplomas for all of the MSc study programmes included in the Master of Science programme.

Subsection 2. The following rules apply for examinations:

- Executive Order on Examinations in University Programmes (the Examination Order).
- Executive Order on External Examiners on Certain Further Education Programmes (the External Examiner Order)
- Executive Order on the Grading Scale and Other Forms of Assessment.

Subsection 3. Please also refer to:

- The IT University's examination regulations.
- The IT University's rules and procedures for complaints.

Chapter 5

Programme specific rules

Programme specific objectives

Digital Design and Communication

Section 15. The Digital Design and Communication graduate will develop knowledge and understanding of:

- the main principles and theories about digital communication and interaction design practices based on the highest level of international research
- design processes aligned with digital media and communication
- how our society affects and is affected by digital media

Subsection 2. The graduate will develop the following skills:

- The graduate can disseminate research-based knowledge about digital design and communication to non specialists and specialists alike
- The graduate can develop digital design and communication concepts for a variety of digital platforms.
- The graduate can program at a basic level for web communication e.g. is able to implement websites and simple databases
- The graduate can apply innovation and project management methodologies appropriate to digital media
- The graduate can produce and analyze empirical material, e.g. about target groups and user needs

Subsection 3. The graduate will develop the following competences:

- The graduate can design and create innovative digital communication solutions in complex and diverse work contexts, including collaboration with people with a variety of skills and backgrounds in teams situated locally or globally
- The graduate can reflectively consider, apply, and evaluate the central methodologies for the study of digital design and communication from a cross-disciplinary perspective
- The graduate can identify and critically evaluate emerging digital genres and technologies and their likely impact on society
- The graduate can successfully design to changing digital media platforms
- The graduate can communicate strategically in various digital media contexts

Media Technology and Games

Section 16. The Media and Technology and Games graduate will develop knowledge and understanding of:

- significant theories related to the understanding of media and games technologies and their cultural and social impact, based on the highest international research within each subject area
- tools, methods and techniques applicable to the development of innovate and creative media and games technologies
- tools, applications and theories applicable to the development and programming of complex media and games technologies

Subsection 2. The graduate will develop the following skills:

- The graduate can identify and characterize a wide set of theories and technologies for the development of media and games technologies and products
- The graduate can recognize the impact and projection of innovative developments in the field of media and games technologies

Subsection 3. The graduate will develop the following competences:

- The graduate can design and develop innovative technologies and concepts within games based on a scientific analysis
- The graduate can manage the complex and unpredictable processes of game development within local and global production requirements
- The graduate can reconcile the limitlessness of creative ideas with the limitations of system requirements
- The graduate can bring about products, prototypes and theories which make appropriate use and analysis of media and games technologies

- The graduate can collaborate with others in interdisciplinary and varied local and global teams in a game design and development process

Subsection 4. Additional track specific competences for graduates from Media Technology and Games are:

- Design track: The graduate can design and develop innovative games and media based on scientific research
- Analysis track: The graduate can carry out research on the relevance of computer games in our culture, society, politics and economics
- Technology track: The graduate can develop innovative technologies applied to the fields of digital leisure

Software Development and Technology

Section 17. The Software Development and Technology graduate will develop knowledge and understanding of:

- general concepts of programming languages
- analysis of software performance in theory and practice
- principles of software design, modelling and software architecture

Each graduate obtains specialized knowledge at international research level in at least one of the above areas, depending on the selected specialization module.

Subsection 2. The graduate will develop the following skills:

- The graduate can use a modern programming platform to implement programs
- The graduate can plan and participate in basic processes and practices of software development
- The graduate can follow good practice in quality assurance to create reliable and secure software

Subsection 3. The graduate will develop the following competences:

- The graduate can write well-documented software that meets given requirements
- The graduate can collaborate with others in complex and changing contexts, including in international and industrial projects, using processes and tools that support such collaboration to design and develop high-quality software

Subsection 4. Additional track specific competences for graduates from Software Development and Technology are:

- Development Technology Track: The graduate can combine domain knowledge with software development expertise to design domain specific software
- Software Engineering Track: The graduate can evaluate, adjust, and implement software development processes and methods in both distributed and local settings

Tracks, mandatory backbone, specializations and optional modules

Digital Design and Communication

Section 18. The mandatory backbone of the MSc study programme Digital Design and Communication consists of modules corresponding to 52,5 ECTS points within the first 3 terms.

Subsection 2. The specialization of the MSc study programme consists of modules corresponding to 22, 5 ECTS points within the first 3 terms.

Subsection 3. The optional modules of the MSc study programme correspond to 15 ECTS points within the first 3 terms.

Subsection 4. The mandatory backbone of the study programme consists of the following four modules:

1. Design of Interactive Products (15 ECTS). The module focuses on methods for collection of data, analysis of data and development of ideas for design of interactive products, and planning and carrying out of explorative design projects in which a definite design problem is not given in advance.
2. Digital Media in Theory and Practice (15 ECTS). The theoretical focus of the module is basic theories of communication, media theories, theories of computer-mediated communication, and historical and present ideas of the communicative potential of the computer. The practical focus of the module is design of communication and visual-aesthetic experiences on the web.
3. Multimedia Applications (15 ECTS). The module focuses on design and construction of multimedia applications, including tools for development of multimedia projects which match the possibilities of the interactive media, both as regards concept and programming.
4. Communication Strategies within IT (7,5 ECTS). The module focuses on theoretical understanding of the special characteristics and conditions of digital media and application of communication strategies on an advanced level.

Section 19. Admission to the study programme requires proficiency in written and oral Danish, cf. the Order on Admission section 8.

Media Technology and Games

Section 20. The mandatory backbone of the MSc study programme Media Technology and Games, the Design Track, consists of modules corresponding to 45 ECTS points within the first 3 terms.

Subsection 2. The specialization of the MSc study programme consists of modules corresponding to 30 ECTS points within the first 3 terms.

Subsection 3. The optional modules of the MSc study programme correspond to 15 ECTS points within the first 3 terms.

Subsection 4. The mandatory backbone of the Design Track consists of the following three modules:

1. Game Theory (15 ECTS). The module focuses on analysis of games and their culture based on research-based studies.
2. Game Design (15 ECTS). The module focuses on the application of design research to computer game design, as well as the design and development of prototypes.
3. Game Development (15 ECTS). The module focuses on the development of innovative products that expand media-and-game technologies, based on a structured and scientific perspective.

Section 21. The mandatory backbone of the MSc study programme Media Technology and Games, the Analysis Track, consists of modules corresponding to 45 ECTS points within the first 3 terms.

Subsection 2. The specialization of the MSc study programme consists of modules corresponding to 30 ECTS points within the first 3 terms.

Subsection 3. The optional modules of the MSc study programme correspond to 15 ECTS points within the first 3 terms.

Subsection 4. The mandatory backbone of the Analysis Track consists of the following three modules:

1. Game Theory (15 ECTS). The module focuses on analysis of games and their culture based on research-based studies.
2. Game Design (15 ECTS). The module focuses on the application of design research to computer game design, as well as the design and development of prototypes.

3. Digital Game Theory (15 ECTS). The module focuses on the advanced analysis of computer games from a highly academic perspective.

Section 22. The mandatory backbone of the MSc study programme Media Technology and Games, the Technology Track, consists of modules corresponding to 45 ECTS points within the first 3 terms.

Subsection 2. The specialization of the MSc study programme consists of modules corresponding to 30 ECTS points within the first 3 terms.

Subsection 3. The optional modules of the MSc study programme correspond to 15 ECTS points within the first 3 terms.

Subsection 4. The mandatory backbone of the Technology Track consists of the following three modules:

1. Programming (15 ECTS). The module focuses on programming techniques applicable to computer games, centered on research-based studies.
2. Game Design (15 ECTS). The module focuses on the application of design research to computer game design, as well as the design and development of prototypes.
3. Game Development (15 ECTS). The module focuses on the development of innovative products that expand media-and-game technologies, based on a structured and scientific perspective.

Section 23. Admission to the study programme requires proficiency in written and oral English. For applicants applying for admission from Fall 2012 a B-Level in English is required, cf. the Order on Admission section 8.

Subsection 2. Applicants for the admission area Technology must have a computer science bachelor's degree or equivalent training.

Software Development and Technology

Section 24. The mandatory backbone of the MSc study programme Software Development and Technology, the Development Technology Track, consists of modules corresponding to 45 ECTS points within the first 3 terms.

Subsection 2. The specialization of the MSc study programme consists of modules corresponding to minimum 22.5 ECTS points within the first 3 terms.

Subsection 3. The optional modules of the MSc study programme correspond to minimum 15 ECTS points within the first 3 terms.

Subsection 4. The mandatory backbone of the Development Technology Track consists of the following three modules:

1. Programming (22, 5 ECTS). The module focuses on introductory programming concepts and practical experience, including imperative object-oriented programming and introductory database design.
2. Foundations (15 ECTS). The module focuses on foundational basis of software development, such as algorithms, data structures and discrete mathematics.
3. Quality Assurance (7,5 ECTS). The module focuses on testing techniques and quality assurance processes.

Section 25. The mandatory backbone of the MSc study programme Software Development and Technology, the Software Engineering Track, consists of modules corresponding to 37.5 ECTS points within in the first 3 terms.

Subsection 2. The specialization of the MSc study programme consists of modules corresponding to minimum 22.5 ECTS points within the first 3 terms.

Subsection 3. The optional modules of the MSc study programme correspond to minimum 22,5 ECTS points within the first 3 terms.

Subsection 4. The mandatory backbone of the Software Engineering Track consists of the following three modules:

1. Software Engineering (15 ECTS). The module focuses on automatic techniques for software development and on software engineering processes (knowledge management, project management, etc).
2. Global Interaction (7,5 ECTS). The module focuses on distributed collaboration in software development including cultural aspects, communication aspects and off-shoring.
3. Software Development Project (15 ECTS). The module aims at giving students the experience of work on a medium-to-large scale project, in realistic conditions.

Section 26. Admission to the study programme requires proficiency in written and oral English. For applicants applying for admission from Fall 2012 a B-Level in English is required, cf. the Order on Admission section 8.

General rules

Section 27. A list of the specialization of each MSc study programme is published on the IT University's website by the Board of Studies ITU in advance of each term.

Subsection 2. The student can apply to carry out an individual specialization. The application must be submitted in writing and include the academic reasons for applying.

Section 28. A list of the study activities constituting the mandatory modules of each MSc study programme is published on the IT University's website by the board of studies in advance of each term.

Chapter 6

Miscellaneous regulations

Transferring to another degree or study programme or track

Section 29. A student wishing to transfer from another degree programme at the IT University to the Master of Science programme, or from one study programme within the Master of Science programme to another, must apply for admission to the programme under the same rules that apply to everybody else who applies for admission to the programme, cf. the IT University's admission rules.

Subsection 2. Transfer from one track to another within the same study programme requires approval by the Board of Studies.

Subsection 3. When assessing transfer applications, the IT University is entitled to consider all registered information about the student's course of studies at the IT University to date.

Subsection 4. When transferring from one MSc study programme to another or from one track to another within the study programme, all passed study activities are automatically transferred to the new study programme. Hence, permission to transfer from one MSc study programme to another will only be granted if passed study activities can be transferred to the new study programme or track.

Subsection 5. When transferring from another degree programme at the IT University

to the Master of Science programme, the student may apply to have passed study activities transferred to the Master of Science programme.

Credit transfer

Section 30. Credits can be awarded for parts of the degree by credit transfer from other institutions, but only up to a maximum of 60 ECTS points.

Subsection 2. Credit transfers for study activities from other institutions require approval by the Board of Studies.

Subsection 3. The content of the activity for which the credit is transferred must correspond with the objectives, academic content and academic level of the study programme. At the same time documentation must be presented to academic content, academic level and the amount of ECTS points.

Subsection 4. Students, who during their bachelor's programme have covered areas which form part of the mandatory backbone of their MSc study programme, may apply to the Board of Studies to replace one or more modules. Students, who replace 22.5 ECTS points or more, must follow study activities within one additional specialization.

Subsection 5. The thesis cannot be transferred, cf. the Order on Study Programmes section 72, subsection 2.

Exemptions

Section 31. When justified by special circumstances, the IT University is entitled to grant exemptions from the rules in the curriculum that have been laid down by the university and the university alone, cf. the Order on Study Programmes section 70, subsection 6.

Subsection 2. The authority to grant exemptions stipulated in subsection 1 is administered by the Board of Studies ITU in the area of responsibility of the Board of Studies, cf. the Act on Universities section 18.

Subsection 3. The Ministry of Science, Technology and Innovation is entitled to grant exemptions from the Order on Study Programmes if justified by special circumstances, apart from instances where the IT University is empowered to grant exemptions, cf. the Order on Study Programmes section 75.

Complaints

Section 32. As regards complaints, please refer to the IT University's rules and procedures for complaints.

Chapter 7

Date of commencement and transitional regulations

Section 33. This curriculum comes into force 1 August 2010 and applies to all students admitted to the MSc study programmes belonging under the Board of Studies ITU, cf. section 2, subsection 2, from autumn 2010.

Subsection 2. Students who are enrolled under previous curriculums have the right to complete their programmes according to the curriculum under which they were enrolled, but may take part in study activities offered under the new curriculum. Examinations under the former curriculum from 2008 will be held for the last time in June 2012.

Subsection 3. Students, who are enrolled under previous curriculums, may apply to the Board of Studies ITU to complete the programme under the present curriculum if this can be done within a maximum of 120 ECTS points.

Subsection 4. When a new curriculum is published, or in the event of significant changes to this curriculum, transitional regulations will be set out in the curriculum.

Approved by the Board of Studies ITU 9 April 2010

Approved by Vice Chancellor Mads Tofte 16 June 2010.
